WHO WE ARE

Built on integrity since 2000.

Vibrant Inc opened its doors in 2000 with a simple model: put senior practitioners on every engagement and finish what we start. Twenty-seven years on, clients across North America still call us when ERP, cloud, or data work has to land on time and keep running.

From ERP and cloud to data, cybersecurity, and AI, our architects and engagement managers own every engagement from discovery through steady state. We are NMSDC Certified, an E-Verify Partner, and Oracle and Microsoft partners. Those credentials show in how we build teams and how we deliver.

"Be the partner of choice, empowering businesses to leverage cloud technology and data analytics for competitive advantage, sustained performance, and long-term growth."

ERP & Enterprise Applications

Whether you're running a complex JD Edwards environment, launching a PeopleSoft or SAP program, or stabilizing a Dynamics 365 rollout that under-delivered. Vibrant's 27-year ERP practice covers the full Oracle stack (JD Edwards EnterpriseOne, PeopleSoft, Oracle E-Business Suite), SAP (ECC / S/4HANA), Workday HCM/Financials, and Microsoft Dynamics 365. Our certified practitioners take ownership from blueprint through go-live and the stabilization weeks that follow.

WHAT YOU GET

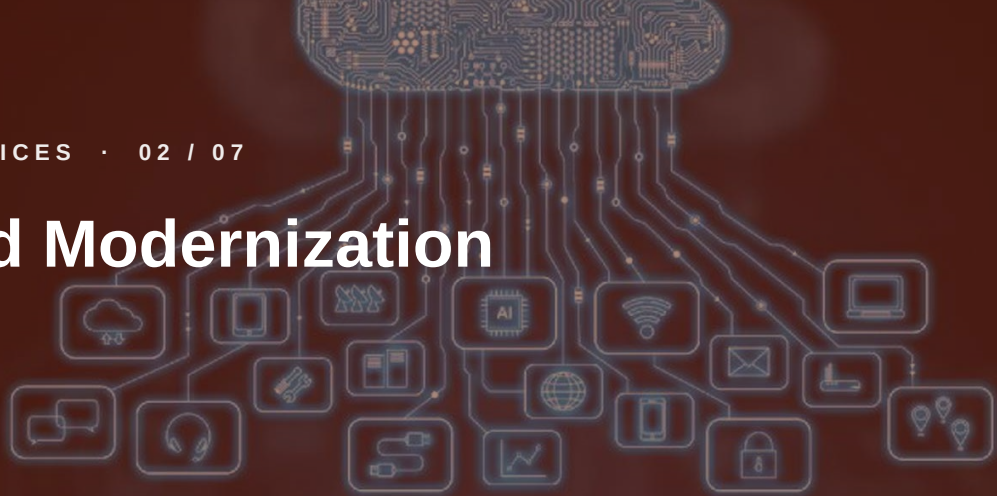

- On-time, on-budget go-lives
- Lower total cost of ERP ownership
- Higher user adoption and measurable ROI

CAPABILITIES

- | | |
|--|--|
| ● JD Edwards EnterpriseOne CNC Administration | ● JD Edwards Functional & Technical Implementation |
| ● SAP Implementation & Support (ECC / S/4HANA) | ● PeopleSoft Implementation & Support |
| ● Workday HCM & Financials | ● Microsoft Dynamics 365 (F&O / CE) |
| ● Oracle E-Business Suite | ● Post go-live stabilization & managed support |

Best fit: Companies replacing legacy ERP, running JD Edwards or PeopleSoft environments needing CNC expertise, or rescuing a stalled SAP or Dynamics program.

Cloud Modernization

We modernize legacy estates incrementally, landing zones, migrations, microservices, and platform engineering, so the business keeps shipping while the foundation gets stronger.

WHAT YOU GET

- Resilient, cost-aware cloud foundation
- Lower run cost via FinOps
- Faster developer velocity

CAPABILITIES

- Cloud strategy & assessment
- Migration & replatforming
- Platform engineering
- Landing zones (Azure / AWS / GCP)
- Microservices & Kubernetes
- FinOps & cost optimization

Best fit: Organizations with legacy data centers or fragmented cloud estates needing a defensible plan.

Cybersecurity & Compliance

Security as an enabler, not a brake. Our AI Shield capability uses machine learning and behavioral analytics to detect, investigate, and neutralize threats faster than any manual approach. We assess gaps, design zero-trust architecture, harden identity, and stand up AI-driven 24x7 detection, aligned to compliance frameworks the business already lives in.

WHAT YOU GET

- Reduced breach exposure and faster detection
- Audit-ready compliance posture
- AI-driven threat response in minutes, not hours

CAPABILITIES

- AI Shield. ML-powered threat detection & response
- Automated incident response playbooks
- Security assessments & gap analysis
- Identity & access management
- Behavioral analytics (UEBA)
- Predictive threat intelligence
- Zero-trust architecture design
- SOC operations (24x7 managed)

Best fit: Mid-market and enterprise companies modernizing security alongside cloud and AI programs, especially those seeking AI-augmented threat response.

AI Readiness

Vibrant helps enterprises move from AI curiosity to AI value. We assess data, talent, and infrastructure readiness, then prioritize and deliver use cases that show up in the P&L.

WHAT YOU GET

- Clear, prioritized AI roadmap
- Shipped pilots tied to a business KPI
- Production-grade MLOps and governance

CAPABILITIES

- AI readiness assessment
- Generative AI pilots
- Data foundation for AI
- Use-case discovery & prioritization
- MLOps & responsible AI
- Change management & enablement

Best fit: Mid-market and enterprise leaders moving past AI experimentation into production value.

Automation

We find the work that shouldn't be done by humans, then automate it. Process discovery, RPA, intelligent document processing, and workflow automation that compound across the business.

WHAT YOU GET

- Hours-back-per-week for high-cost teams
- Fewer manual errors and rework
- Compounding savings across functions

CAPABILITIES

- Process discovery & mining
- Intelligent document processing
- Business process redesign
- RPA (UiPath, Automation Anywhere, Power...)
- Workflow automation
- Citizen developer enablement

Best fit: Operations-heavy organizations with measurable manual workload to compress.

Data & Analytics

From data strategy to dashboards, we build the platform and the reporting layer that gives leadership numbers they trust, and gives analysts the freedom to answer their own questions.

WHAT YOU GET

- Executive dashboards tied to KPIs
- Reliable, governed reporting
- Reduced manual spreadsheet work

CAPABILITIES

- Data & analytics strategy
- Power BI / Tableau / Oracle BI
- Data quality & governance
- Modern data platform (Snowflake, Databricks)
- Data warehouse modernization
- Self-service analytics enablement

Best fit: Organizations with data, but no consistent decision-grade reporting.

Managed IT

Vibrant's managed services give lean IT teams the depth, coverage, and senior escalation they need, without growing headcount. From application managed services to FinOps to managed SOC.

WHAT YOU GET

- Predictable IT operating costs
- 24x7 coverage without growing headcount
- Senior escalation when you need it

CAPABILITIES

- Application managed services
- Managed SOC
- Database administration
- Cloud operations & FinOps
- Service desk & end-user support
- Staff augmentation

Best fit: Lean IT teams that need depth, coverage, and senior escalation paths without hiring.

Every SAP discipline under one roof.

One SAP team, accountable for the whole lifecycle. We implement S/4HANA, keep production stable through AMS, modernize supply chain execution, extend cleanly on BTP, and design Fiori experiences users actually adopt. Because most estates are not SAP-only, the same practice carries JD Edwards CNC and PeopleSoft depth.

- S/4HANA Implementation & Migration
- Supply Chain: EWM · TM · IBP · PP
- Integration: EDI, IDoc, APIs
- Clean Core & Upgrades
- JD Edwards CNC Services
- Application Management (AMS)
- Business Technology Platform (BTP)
- Fiori & UI5 User Experience
- ABAP & Custom Development
- PeopleSoft HCM / FSCM

OUR DELIVERY FRAMEWORK

The VIBRANT Method: agile delivery, enterprise accountability.

Value Discovery

Iterative Design

Build in Sprints

Refine & Validate

Activate & Adopt

Nurture & Optimize

Transform & Scale

Seven letters, seven phases. Senior-led sprints, weekly demos, and outcomes you can measure.

FEATURED PLATFORM

AI Shield: security that thinks faster than attackers.

Our proprietary detection-and-response capability uses machine learning and behavioral analytics to spot what rule-based tools miss and neutralize it in minutes, not hours.

ML-powered detection

Models tuned to your environment cut false positives.

Behavioral analytics

Baselines every user, flags the deviations that matter.

Automated response

Pre-approved playbooks contain threats day or night.

Predictive intelligence

Pattern analysis that warns before attacks land.

CLIENT OUTCOMES

Results that show up in the business.

40%

faster month-end close

Global Manufacturer · SAP S/4HANA

\$3M+

annual savings

Retail Distributor · Supply Chain

60%

faster reporting

Healthcare Network · Azure & Data

Trusted by companies across North America including Amphenol, TEKsystems, Vaco, Radiant Systems, V-Soft Consulting, MOURI Tech, Enavate, Infojini, iLink Digital, and more.

LEADERSHIP

Senior architects. Founder-led delivery.

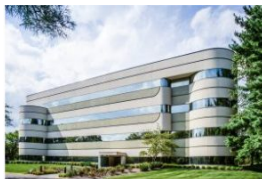

Suresh Reddy

Founder & President · ITIL Foundation Certified

27 years leading enterprise transformation across cloud, enterprise applications, DevOps, and AI for Fortune 500 partners.

- **Chaitanya Kumar Komatireddy** Principal Enterprise Architect
- **Sathish Donthula** Principal SAP Solution Architect
- **Dishanth** Principal Cybersecurity Architect
- **Sai Varma** Principal AI Solutions Architect
